SWISS + MADE

Compact and beautiful to look at

Versatility

Because it's performance that counts

Compact and beautiful to look at

Now, fabulous coffee comes to the office. The new machine, designed specially for office use, is based on the same technology that made the IMPRESSA F50 the outright winner in a comparison of fully automatic and espresso machines in the December 2004 issue of »Stiftung Warentest« (Germany's best-known consumer advice magazine). For the first time ever, one fully automatic machine made a resounding impression with a »very good« espresso flavour and a »very good« crema. Apart from making a top-quality cup of coffee, the new machine is unusually designed and has a clear-cut operating concept, with all maintenance at the touch of a button. Where a daily capacity of around 30 cups is called for, the compact IMPRESSA Xr50 has got what it takes.

Simple operation

If you wish to use the IMPRESSA Xr50 to make coffee specialities, it couldn't be easier. Operating elements are reduced to a minimum and clearly understandable. Simply turn and push to navigate intuitively through the entire range – the Rotary Switch makes it all possible.

Compact, and a great looker all round

Thanks to its compact dimensions, the machine fits in virtually anywhere and is an attractive feature of any room. With a great deal of care and love of detail, designer Wolfgang Jönsson has turned every side of the IMPRESSA Xr50 into a genuine eye-catcher.

Versatility

If you have a longing for a cup of tea, satisfy it with the programmable tea portion function. The Connector System® allows you to use a water jet, steam jet and the optional Professional Cappuccino Frother.

Because it's performance that counts

The IMPRESSA Xr50 comes into its own when you want to make something like 30 cups of coffee specialities a day: in offices, car showrooms, boutiques or hairdressing salons, for instance. It is maintained and ready for use in seconds. All you have to do is concentrate on essentials – like enjoyment. Needless to say, you can also use a second, pre-ground coffee blend: thanks to the powder dispenser monitor, the intelligent electronics recognize it automatically.

IMPRESSA XF50

Simple operation

Technical data
